TITLE : TICKET INSPECTION SYSTEM

ABSTRACT : PROBLEM TO BE SOLVED: To easily and surely inspect a ticket without impairing passenger services in a ticket inspection system for trains or the like.

SOLUTION: A passenger buys a train ticket 50 for the radio transmission/ reception of data at a train ticket vending machine 10 while using a card 70 such as a prepaid card. In the case of ticket inspection inside a car after ticket examination at a ticket examination device 20, the ticket is inspected by exchanging data such as the region of line or validity between a portable ticket inspection device 40 carried with a crew and the train ticket 50 or a commutation ticket 60 carried with the passenger and a ticket inspected signal or an invalid alarm signal is transmitted to the train ticket or the commutation ticket. Thus, the ticket can be easily and surely inspected without awakening the passenger under sleeping, for example.
